Antech Cheque Writer 5 Printer Support

Important:

Please make sure you download the trial version and try it before purchasing the Software.

For Cheques:

Most of the Printers are supported. As long as the Printer can take in the Cheque Size in Landscape our Software is capable of printing the Cheque.

You can also create a Custom Size if your Printer Driver supports Custom Size.

Our Software is capable of calibrating the Cheque Size based on A4.

For Envelopes:

You should be able to print all the predefined Envelopes in your Printer. Additionally you can create Custom Size if your Printer driver allows to do it.

Supported Printers:

Dot matrix – Limited Support. You must be able place the Cheque on the Tray (No Roller Option).

Deskjet (Laser) – As long as the Printer can take in Cheque Size the Software should be able to print

Inkjet – As long as the Printer can take in the Cheque Size the Software should be able to print.

MFC - As long as the Printer can take in the Cheque Size the Software should be able to print.

Photocopiers – Limited Support. For more help please contact your local printer support.

For Support please email support@antech-solutions.com. Please give us the brand name, model no and the country that you are using the Printer and we will try our best to help you.
